

RESIDENTIAL ELEVATOR SPECIALISTS

AHE Home Elevators

A woman wearing a yellow hard hat and a dark suit is smiling and holding a rolled-up set of blueprints. She is standing in front of a modern, multi-story house at night, with the interior lights glowing through the windows. The house has a prominent octagonal bay window.

Congratulations

on your decision to include a residential elevator in your home design.

A residential elevator is one of the few home amenities that will add permanent value to both the use and resale of your home.

In fact, research has shown, a high quality residential elevator will increase the resale value of a home by up to 10%, while expanding the potential resale market to include those who otherwise may not have considered a multi story home.

As you look through our brochure you will find that we offer a variety of styles and finishes that are sure to complement your décor. Whether choosing our basic cab or employing our custom design services, you can have complete confidence that each and every elevator is designed and manufactured with industry leading safety components and will meet or exceed all current design standards.

We are honored that you are taking the time to view our product and look forward to gaining your trust, and eventually welcoming you into the AHE family.

Commitment to Excellence

With 25 years experience and a passion for quality, Accredited Home Elevator (AHE) Manufacturing is THE choice for high quality home elevator designs. Family owned and operated, AHE has grown to become one of the nation's most highly regarded home elevator manufacturers.

From our structurally engineered designs to our furniture grade interiors, we strive for perfection in all we do. Our endless pursuit of perfection is evident in the smooth quiet ride and consistent reliability of each and every elevator we produce.

Just as important as our physical product is the network of dealers supporting it. We work hard to surround ourselves with companies who share our commitment to excellence. To achieve this, we employ one of the strictest dealer selection criteria in the industry.

To you, the end user, this assures you of only one thing. If you have found an installation company that has been officially approved to offer our product... look no further. You have found your installation company.

Bristol

With clean lines and timeless style, the Bristol offers flat panel hardwood veneer walls with flat ceiling, matching wood handrail and globe lighting. (Optional custom hardwoods, picture framing and decorative appliqués available).

Flat ceiling with globe light standard. Optional picture framing and other optional lighting available.

Matching wood handrail standard

Optional tray ceiling, shown with 4 recessed down lights, can be added to any cab.

Shown in clear coat oak with globe light, matching wood handrail and optional wood flooring.

All cabs come standard with unfinished flooring to allow for installation of tile, hardwood or other floorings of your choice.

Longport

Bright, fresh and airy, the Longport offers white painted interiors with applied picture framing, brushed metal handrail and a matching flat ceiling.

Flat ceiling with globe or 2 recessed lights standard. Picture framing on ceiling and additional recessed lights available.

Brushed metal handrail standard

Shown in standard white lacquer finish with stainless steel handrail, 2 recessed lights, and custom flooring installed by contractor.

Whether you are looking to increase resale value or add accessibility, no other home amenity can compare to the benefits you receive from the installation of a home elevator.

Avalon

Classic recessed panel designs in both 3 and 4 panel configurations. Offered in standard choices of oak, birch or maple with matching wood handrail. (Optional custom hardwoods, panel inserts and decorative appliques available).

Shown in oak with optional chestnut stain
and wood flooring

Optional brushed brass handrail (shown).
Matching wood handrail standard.

Woods & Finishes

All cabs can be factory finished in a variety of colors to complement your individual style and taste. We use only the highest quality stains and finishes on our cabs. We are committed to producing nothing short of furniture grade wood work. Below is a list of our fine stain offerings shown on maple and oak.

All woods are unique in color, density, and grain. Therefore actual finished wood may differ slightly from the printed samples shown above.

Lighting & Gates

AHE offers both recessed and surface mount lighting to pair with your chosen ceiling design and to properly light your elevator cab. All lighting finishes are coordinated with car operating panel and phone box finish. Please see lighting and ceiling samples below.

Preparatory Work by Others

HOISTWAY

Construct elevator hoistway in accordance with ANSI A17.1 and all local codes. No items not directly involved with the function of the elevator are allowed in hoistway.

Hoistway framework must be plumb and square within 1/2" over the entire rise. Hoistway doors to be installed plumb, one above the other in accordance with A17.1 Rule 5.3.7.1.2.

Adequate rail bracket support must be provided. Please contact factory or local dealer for specifics.

PIT

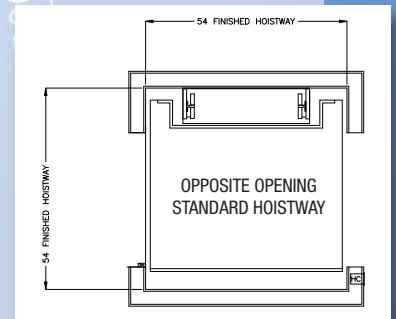

Construct Minimum 9" (12" recommended) pit to receive elevator at lower most landing. Pit dimensions shall be the same as the shaftway dimensions and be so constructed that the pit floor will bear the following loads:

Impact Load @ pit 4750 lbs.
Static Load @ pit 2900 lbs.

MACHINE SPACE

Provide adequate, code compliant machine space for elevator equipment adjacent to shaft with below listed electrical connections. Machine space shall be equipped with a light and duplex receptacle.

ELECTRICAL (located in machine space)

1. A Dedicated 220 VAC 30 AMP single phase power supply with 3 pole lockable, fused disconnect switch for elevator power, per N.E.C.
2. A dedicated 120 VAC 20 AMP single phase power supply with lockable, fused disconnect switch or circuit breaker for car lighting per N.E.C
3. Active phone line.
