Garaventa's Residential Inclined Wheelchair Lift

X3-R Benefits

Independence - The freedom to travel between all levels of your home.

Ease of Use - The platform controls are large and easy to use. The lift can be upgraded to a fully automatic folding platform (optional) with wireless call stations.

Cost-effective - The installation cost of the X3-R is significantly lower than the price of moving to another home.

Convenience - When stairs become a challenge, our loved ones must often be hand carried or lifted in their chair step by step. The installation of an X3-R alleviates the difficulties of moving up and down the stairs and provides a safe and efficient way to make the home accessible.

Compact and Space Savings - When folded the lift takes up a minimal amount of space on the stairs and will not effect other users of the stairway.

Safety - The X3-R is equipped with curved safety arms, multiple safety sensors, and an emergency stop switch.

Short Delivery & Installation Time - Standardized components allow Garaventa to provide you with a lift configured to suit your stairway with a very short delivery time. The X3-R can usually be installed in a day and does not typically require major construction.

Experience - Garaventa has been providing accessibility for commercial and residential projects for 35 years. The X3-R has been specifically developed to meet the needs of our residential customers.

Service - Your local Garaventa authorized representative has the training, expertise and the correct parts to keep your X3-R operating properly.

Garaventa X3-R Model

Often the home we have lived in for years suddenly presents challenges when we are unable to use or have difficulty climbing the stairs. The Garaventa X3-R will allow you to travel up and down the stairs with ease while allowing you to stay in the home you love.

Standard Features

- A choice of three platform sizes
- Capacity of 250kg / 550lbs.
- Curved safety arms that fold down when stored
- Large, easy to use platform control buttons
- Rack & pinion drive system with battery operation
- Safety sensors – under the platform and on the leading ramp
- Manual fold and unfold
- Passenger grab bar
- Platform emergency stop button

The narrow folded width of the X3-R leaves ample space on the stairway for others.

Optional Features

- Wireless Call Stations
- Fully automatic platform with powered ramps and arms
- Side load
- Attendant remote control
- Folding seat
- Support towers

The side load option makes it easy to board the platform in small landing areas.

The X3-R platform controls feature easy to use large constant pressure buttons. Note how this passenger uses her elbow to operate the lift.
